

TASK TO PERFORM

Perform the following task and note down all the steps along with screenshots.

1. Import the table called "**webpage**" from "**devsh_loudacre**" database in Mysql to hdfs.
2. Create a table on Hive called "**webpage_titanic**" which must contain only the data related to "**titanic**" under the column "**associated_files**".
3. Make the table "**webpage_titanic**" transactional.
4. Create partitioned table based on **depts** (dept10, dept20, and dept30).
